for the event or call White Ryder at (424) 458-8426**

**Tickets price: \$35.00**

**About the Event:**

Join Jerry Yusko and White Ryder for a fascinating afternoon of inter-dimensional connection, shared wisdom, and cosmic understanding.

Jerry will introduce you to Athera and Shantara, benevolent Zeta beings who have infused their energy into two statues, allowing them to communicate telepathically with humans if they wish to. They have been known to do wellness tune-ups for people, which has helped them recover from ailments and other challenges in their lives. I cannot guarantee they will do the same for you, but who knows... maybe they will.

If you like you can fill out a contact questionnaire that will be provided for you.

This questionnaire might help you remember if you have had contact or not.

Jerry will explain five different ways we can have contact with ETs.

Then we'll open a 15-minute group discussion for sharing your experiences.

No experience is necessary to benefit from this lecture, everyone is invited.

Jerry has been in contact with the Grays, Lyrans, Pleadians, Arcturians, Kebens, and other beings from a very early age. His main focus will be on Athera and Shantara. He applies the knowledge gained from his encounters and training to help others understand their gifts and true value as experiencers.

White Ryder will be talking about his new book 'Journey to Venus, A Guide to Direct Contact and Ascension'. He will be sharing messages he received from 'The Chancellor of Venus' and the Venusian wisdom.
